Bold statement

ABOVE: Clear Water Pools Limpopo designed and built this magnificent pool to the home owners' requirements, complementing the design of the home. The company also supplied the filter systems as well as the heating system, and undertook the tiling inside the pool. Lined with fibreglass and painted in a "strong blue" colour, the pool is a striking focal point.

"It is difficult to describe the feeling of overwhelming joy," explain the home owners on how it felt to finally walk into their completed home. "It must be similar to children on Christmas Eve, with all the presents and toys that they will be receiving."

Taking more than six months in planning the design and layout of the home, the home owners went above and beyond to ensure that every element of the house was exactly to their specifications and needs, and that their home was all that they have ever dreamed of.

PRLB DESIGNS 013 653 6375

ABOVE: Working closely with the client to create their dream home, architects PRLB Design undertook all the design elements of the structure. The company specialises in the planning and design of properties to create homes unique to the needs and lifestyle of its clients.

"What we had in mind was to build a 'wow' house, something the bushveld has never seen before, with the design and architecture being new and different to what people are used to today."

The house stands proud as an architectural masterpiece a mere 30m from the 10th green, and makes best use of the natural views in this idyllic estate.
